## SUMMARY

Fresh graduate Informatics Engineering from UIN Syarif Hidayatullah Jakarta (GPA 3.70) with a balanced profile across software development, business analysis, and client-facing communication. Built database-backed applications, translated financial workflows into working systems, and supported users in high-volume operational settings. Open to technology, data, and business operations roles.

## EDUCATION

**UIN Syarif Hidayatullah Jakarta**  
Informatics Engineering; GPA: 3.70

**Tangerang Selatan, Banten**  
September 2022 - August 2026

## PROJECTS

### Sectors Copilot - Multi-Step LLM Research Agent

*Hackathon Project*

*September 2026*

- Front-end developer of a modular Laravel application in which an LLM agent (Google Gemini function calling) plans multi-step research and calls external data services in sequence.
- Built the interface that streams each agent execution step to the screen in real time, exposing the model's planning, tool calls, and synthesis instead of hiding them in a black box.

### ETIC Question Generator - LLaMA 3.1 Fine-Tuning with LoRA

*Undergraduate Thesis*

*February – August 2026*

- Fine-tuned LLaMA 3.1 8B Instruct (4-bit quantized) with LoRA to generate domain-specific multiple-choice questions, training 83.9M of 8.1B parameters (1.03%) over 236 steps at a final training loss of 1.3605.
- Built the pipeline in Python using PyTorch, Hugging Face Transformers, PEFT, TRL, and Unsloth, and evaluated output with BLEU, BERTScore F1, and ROUGE across two prompt scenarios (BERTScore F1 0.8729 and 0.8443).

### Cooperative Financial Management System - Laravel Web Application

*Freelance Project*

*February - March 2025*

- Built the front end of a Laravel and MySQL system managing cooperative financial operations: cash income, expense, and transfer transactions, member savings, and loan records.
- Developed reusable Blade views with Tailwind CSS and Alpine.js for transaction forms, data tables, and reporting, working from structured requirements alongside a backend developer.

### Grain Dryer Automation Prototype - ESP32

*Embedded Systems Course Project*

*December 2024*

- Programmed an ESP32 microcontroller in C to automate a grain dryer: read temperature, humidity, light, and rain sensors, then controlled a relay-driven heater through threshold-based conditional logic.
- Added sensor read-failure handling to keep the control loop stable when a sensor returned invalid data.

## EXPERIENCES

### Comifuro (Comic Frontier)

**Tangerang, Banten**

Ticketing Staff & Crowd Management

November 2024 - May 2026 | 4 Event Cycles

- Supported international attendees from 5+ countries across four large-scale event cycles of 18,000-22,000 attendees each.
- Served as point of contact for visitor inquiries, resolving ticket and entry issues under pressure while coordinating with cross-functional teams during peak hours.

### Language Development Center, UIN Jakarta

Receptionist & IT Support

**Tangerang Selatan, Banten**

September 2025 - December 2025

- Handled 30+ front-desk and IT support inquiries per day, delivering clear and structured information to students and external participants.
- Prepared, printed, and scanned documents, and collaborated with internal staff to streamline recurring administrative workflows.

Hamzah Arabic Competency Test - Committee Member

September 2025

- Served on the organizing committee for the Arabic competency test held by the King Salman Global Academy for Arabic in partnership with UIN Jakarta's Language Development Center.
- Supported test administration and participant handling across a two-day event.

Proctor

November 2025 - December 2025

- Guided test participants through session procedures across multiple standardized tests per week, ensuring compliance with testing standards.
- Maintained 20+ participant records per test cycle with high data accuracy across TOEFL and TOAFL assessments.

## CERTIFICATIONS

---

- IBM SkillsBuild  
Getting Started with Data; Classifying Data Using IBM Granite; Unleashing the Power of AI Agents (September 2026)
- Oracle Academy  
Database Design; Database Programming with SQL (January 2024)

## SKILLS

---

**Programming:** PHP, JavaScript, C, Python (basics), Laravel, Blade, Tailwind, CSS, HTML

**Database:** SQL (MySQL, SQLite), PostgreSQL

**AI & Data:** LLM fine-tuning (LoRA), prompt engineering, model evaluation (BLEU, BERTScore, ROUGE), AI agent, data preprocessing

**Systems & Business:** System Analysis, Requirement Gathering, Business Process Workflows (financial transactions), Project Documentation, IT Project Management, Project Scheduling (Jira)

**Tools:** Git/GitHub, Microsoft Excel, Microsoft Office

**Soft Skills:** Stakeholder Communication, Problem Solving, Analytical Thinking, Attention to Detail, Teamwork, Adaptability, Cross-Cultural Communication

**Languages:** Bahasa Indonesia (Native), English (Intermediate)
